## PERSONAL PROFILE

I consider myself in love with mathematics and the Universe. I'm Lic. in Astronomy and finishing my Ph.D. in theoretical physics. Since I also love technology (particularly Artificial Intelligence) I did Data Science courses and also some personal projects. With them, I learned very valuable skills that, complemented with my academic formation, turned me into a versatile person, capable of adapting to any task or problem to solve. I enjoy working with people from different areas, as multidisciplinary collaboration is key to the advancement of society. Some of my hobbies are playing and collecting retro games, programming, reading, and thinking about the future.
